Transfer a Lertap5 License

As of the date above, Lertap5 users who have purchased a license and received an unlock code will be able to transfer their licensed Lertap5 system to a new computer by following the steps below.

1. On the original computer: copy the folder containing the Lertap5 suite of files, including Lertap5.xlsm, Lertap5MacroSetA.xlam, and LertapRibbon.xlam to the new computer.
2. Open the folder on the new computer and then open Lertap5.xlsm. A “Discrepancy Report” will appear with a “Copy data to the clipboard” option. **IGNORE this report.** Dismiss it by clicking on the small x in the upper right-hand corner. Lertap5 will close after you do this and will then remain on your computer as the “Mini version”, limited to 250 records.
3. Request a “special unlock code” by sending an email to lertap5@gmail.com (Payment of a small associated cost will be requested.)
4. On the new computer, use the special unlock code to upgrade Lertap5.xlsm to the full version. In the process of doing so you will be directed to close Lertap5 – that’s crucial.
5. Still on the new computer, open Lertap5.xlsm and confirm that it has indeed been upgraded to the perpetual fully unlocked version. (Use [the Version option](#) from the Lertap menu.)
6. On the new computer, take Lertap5.xlsm for some test drives using a dataset of your own.
7. Back on the original computer, delete the folder containing the Lertap5 suite of files. This is of course important – if you were to keep that folder you would still have an unlocked copy of Lertap5 on the original computer. Should you decide not to delete the Lertap folder on the original computer you will then have two unlocked copies of Lertap5 but paid for just one. Pay for the second one with the purchase a new license from [The Store](#). Thank you in advance. We need and value your support.
